

Hari Prasad MR

SOC Analyst | Network Engineer | ISO 27001/27701 Lead Auditor

harishmr021@gmail.com 7026698489 Bengaluru linkedin.com/in/hari-prasad-mr-980300222

SUMMARY

Network Engineer with a growing focus on cybersecurity and SOC operations, with hands-on experience monitoring networks, troubleshooting connectivity issues, handling firewall configuration, and working with security monitoring tools in enterprise environments. Experienced with tools such as Wireshark, OPNsense, Kaspersky Endpoint Security, Kaspersky KUMA SIEM, NMIS, and NetBox while supporting LAN/WAN infrastructure and endpoint monitoring. Alongside networking, has been building cybersecurity and governance skills through SIEM monitoring, log analysis, traffic investigation, and security-focused projects, and holds Lead Auditor credentials in ISO/IEC 27001:2022 (Information Security Management) and ISO/IEC 27701:2025 (Privacy Information Management), bringing audit and compliance expertise alongside technical security operations. Currently preparing for CompTIA Security+ and aiming to grow into a SOC Analyst role.

PROFESSIONAL EXPERIENCE

Network Engineer

Arridae Infosec Pvt Ltd

2025 – Present

Bengaluru

- Monitor enterprise network infrastructure using NMIS and SNMP to ensure stable network operations
- Troubleshoot issues such as VLAN mismatches, packet loss, cable faults, and connectivity failures
- Work with networking devices from vendors including Juniper, Brocade, and D-Link
- Configure VLANs, trunking, and basic port security based on operational requirements
- Handle firewall rules and access policies using OPNsense Firewall
- Support DNS, DHCP, IP allocation, VPN access, and LAN/WAN connectivity
- Use Kaspersky Endpoint Security to monitor endpoint alerts and maintain system protection
- Work with Kaspersky KUMA SIEM to monitor logs, review alerts, and track network activity
- Maintain network inventory and topology documentation using NetBox
- Provide L1 support for users and escalate critical incidents when required
- Coordinate with senior engineers during troubleshooting and issue resolution

Network Engineer Intern

Arridae Infosec Pvt Ltd

03/2025 – 05/2025

Bengaluru

- Assisted with monitoring and troubleshooting LAN/WAN network environments
- Used Wireshark and Nmap for packet analysis and basic network investigation
- Supported Windows and Linux administration tasks
- Worked with endpoint security tools for monitoring and threat visibility
- Helped identify connectivity issues and supported routine maintenance activities

EDUCATION

Bachelor of Computer Applications

East West School of Business Management

08/2022 – 05/2025

Bengaluru

SKILLS

Security Operations & SIEM: Security monitoring | Log analysis | Alert investigation | Basic incident response | Threat monitoring | SIEM fundamentals | Kaspersky KUMA SIEM | Endpoint security monitoring

Network Infrastructure: TCP/IP | VLAN configuration | Routing and switching | LAN/WAN troubleshooting | SNMP monitoring

Security & Monitoring Tools: Wireshark | OPNsense | Kaspersky Endpoint Security | NMIS | NetBox | Nmap | Cisco Packet Tracer | PuTTY | VS Code

Operating Systems & Platforms: Windows administration | Linux/Ubuntu | Basic virtualization

Scripting & Automation: Python | Git version control

Compliance & Audit: ISO/IEC 27001:2022 Lead Auditor (ISMS) | ISO/IEC 27701:2025 Lead Auditor (PIMS) | Information security governance | Audit planning and reporting

Security Frameworks & Concepts: OSI model | Network security fundamentals | Access control | Endpoint protection | Security monitoring concepts | ISO/IEC 27001 | ISO/IEC 27701

CERTIFICATES

CompTIA Security+: In progress

SOC Analyst Training: In progress

ISO/IEC 27001:2022 Lead Auditor: Information Security Management Systems

ISO/IEC 27701:2025 Lead Auditor: Privacy Information Management Systems

CTIGA (Certified Threat Intelligence & Governance Analyst): Red Team Leaders, Mastermind

ISO 27000: Mastermind

PROJECTS

Artificial Voice Assistant using Python

- Developed a Python-based voice assistant capable of executing voice commands and system operations
- Implemented speech recognition and text-to-speech functionalities using Python libraries
- Integrated features such as application launching, web search, and system information retrieval

Sentiment Analysis using AI & NLP

- Developed a sentiment analysis model using Python and Natural Language Processing techniques
- Classified text into positive, negative, and neutral sentiment categories
- Performed text preprocessing, tokenization, and basic machine learning model evaluation
